

Please note that the postal code should be input in the "Postal code" column, not the "Address" column. Please find the actual postal code by yourself.

Country	postal code type (digits, characters)
Ireland	7 alphanumeric characters called Eircode Example: T37 F8HK
Italy	5 digits Example: 00184
Estonia	5 digits Example: 69501
Austria	4 digits Example: 1120
Netherlands	6 alphanumeric characters (4 digits and 2 letters, with a space between the digits and the letters) Example: 1071 DJ
Cyprus	4 digits preceded by "CY" Example: CY-2008
Greece	5 digits, with a space between the 3rd and 4th digits Example: 104 32
Croatia	5 digits preceded by "HR" Example: HR-10000
Switzerland	4 digits Example: 3008
Sweden	5 digits, with a space between 3rd and 4th digits preceded by "SE" Example: SE-111 81
Spain	5 digits Example: 28021
Slovakia	5 digits, with a space between the 3rd and 4th digits Example: 810 00
Slovenia	4 digits Example: 1000
Czech Republic	5 digits, with a space between 3rd and 4th digits Example: 160 00
Denmark	4 digits Example: 2300
Germany	5 digits Example: 10115
Norway	4 digits Example: 0352
Hungary	4 digits Example: 1011
Finland	5 digits preceded by "FI" Example: FI-00100
France	5 digits Example: 75001
Bulgaria	4 digits Example: 1278
Belgium	4 digits Example: 1050
Poland	5 digits, a dash between 2nd and 3rd digits Example: 02-502
Portugal	7 digits, a dash between the 4th and 5th digits Example: 1300-016
Malta	7 alphanumeric characters Example: RBT 6023
Latvia	4 digits preceded by "LV-" Example: LV-1000
Lithuania	5 digits preceded by "LT-" Example: LT-04340
Romania	6 digits Example: 013696
Luxembourg	4 digits preceded by "L" Example: L-1234
