WELCOME TO THE PRIOR NOTICE SYSTEM INTERFACE

The Prior Notice System Interface enables you to submit Prior Notices for Imported Food Articles to the Food and Drug Administration (FDA).

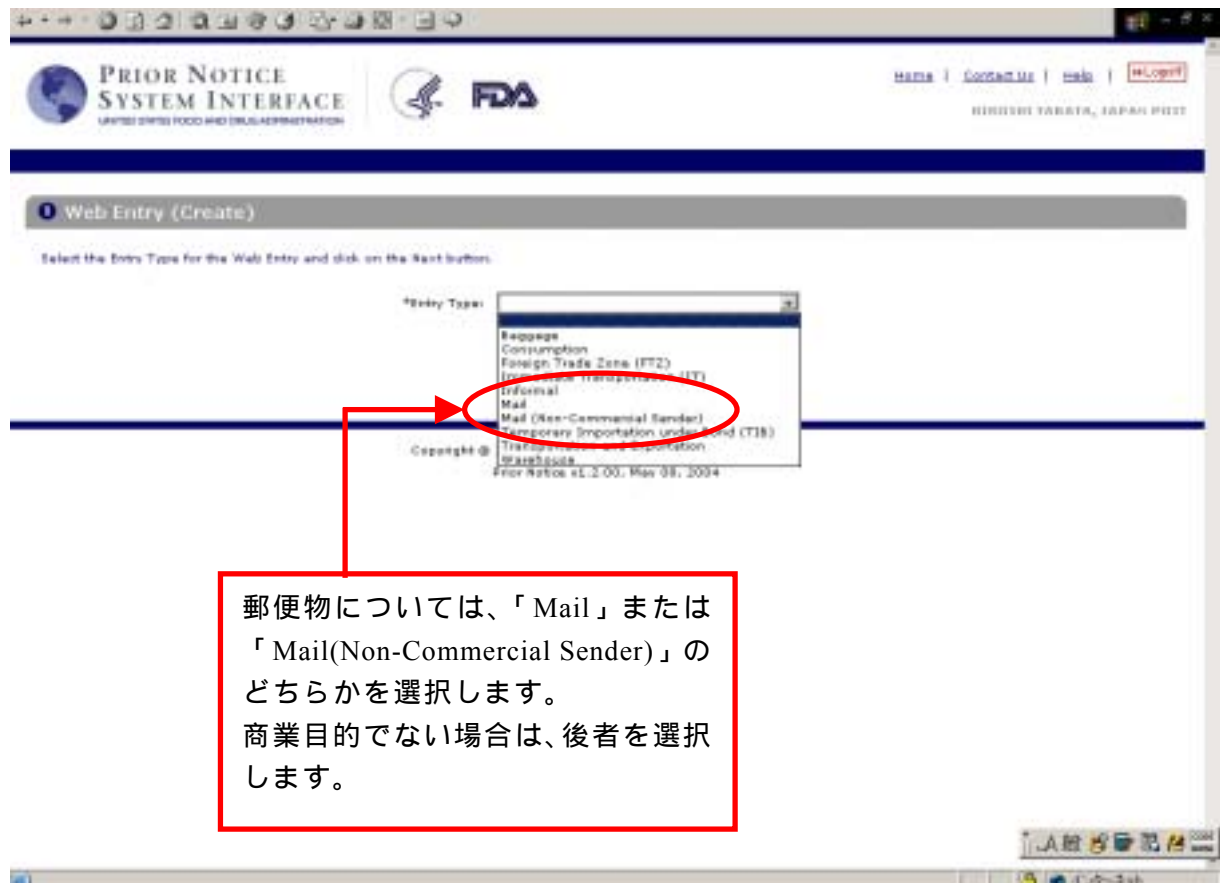

The system automatically "Completes" Web Entries with submitted Prior Notices when the Prior Notice submission timeframe elapses (see the "Complete Web Entry" help topic). The system automatically removes Web Entry and Prior Notice data for Web Entries with an Anticipated Arrival Date or Shipment Date that is more than 30 days in the past.

- Get Started** - Overview of how to submit a Prior Notice for food importation.
- Learn New Features** - Overview of New Features available in this version of the Prior Notice System Interface.
- Create New Web Entry** - Creating a Web Entry is the first step in creating Prior Notices. A Web Entry contains information that one or more food articles you intend to import share (e.g., arrival information). After Creating a Web Entry, create, revise, and submit Prior Notices. Prior Notices include information about the Product, its Quantity and Packaging, and other related information, such as the Manufacturer or Producer (Grower/Manufacturer or Consolidator) and the Shipper.
- Find Existing Web Entry** - Use this feature to find Web Entries that you have already created.
- Find Existing Prior Notice** - Use this feature to find Prior Notices that you have already created.
